

Contacting clinics and wards

Our busy outpatients department sees around half a million patients each year. If you need to contact one of our clinics for any reason, please use the listed contact details for that clinic. Many of the clinic pages also contain other useful information for patients.

If you have an appointment with one of our clinics and no longer need it or want to rearrange it please let us know. If we have no warning, we can't give the slot to someone else who really wants it.

Please note that most clinic are open during office hours only.

We also provide a list of wards, including visiting times and directions.
