Inpatient and outpatient hepatology/liver disease services

- Alcohol-related liver disease
- Non-alcohol related fatty liver disease (NAFLD)
- Liver cancer
- Viral hepatitis
- Chronic liver failure
- Portal hypertension
- Inherited liver disease
- Autoimmune liver diseases (primary biliary cholangitis [PBC], primary sclerosing cholangitis [PSC] and autoimmune hepatitis [AIH])

Finding us

Information on getting to the hospital is given here

Outpatient clinics are usually held in either Clinic 1a or Clinic 12

The inpatient wards are D5 (Liver Unit) and F5/G5 (Transplant Unit)

Procedures may be carried out through the Radiology Day Case Unit situated on Level 3 in the Outpatient Block. Overnight accommodation is sometimes required for patients and visitors
