Pathology

Pathology

The Pathology service at Cambridge University Hospitals NHS Foundation Trust offers a comprehensive range of pathology services, which are fully supported by a wide range of highly experienced and qualified technical, scientific and consultant-grade staff. The key service objective is to provide, interpret and report analytical results with appropriate attention to quality, speed and economy, and where necessary, provide advice on any further investigations that are indicated.

Pathology processes over 3.5 million samples every year including from patients within Addenbrooke’s Hospital and from GP surgeries and other hospitals across the East of England. Many of our departments are nationally and internationally recognised specialist centres and we receive referrals from across the world for a wide range of complex and rare disorders.

Contacting CUH Pathology

The Service Desk is based in Newmarket and provides a front line support service to all users of the CUH Pathology service including GPs, community nurses and midwives, hospital staff, patients and laboratory staff. The team has access to multiple laboratory systems and is able to provide results, bottle information, add on tests, book phlebotomy appointments at West Suffolk Hospital and Sudbury Health Centre, place GP stock orders and provide a first level IT service for NHS.net email account password resets and creating new users on the pathology ICE system. The team can also direct calls to the duty doctors or individual departments as needed.

The Service Desk can also provide information on turnaround times, tests available and ordering processes or you can contact us using the contact details listed for the individual departments.

Telephone: 0333 103 2220

Email: pathp.servicedesk@nhs.net
Opening hours 8am to 6pm Monday to Friday. Outside these hours, please listen to the announcements and select the option to speak to the relevant laboratory. Note that we cannot take calls from patients outside these hours.

**Departments in Pathology**

If you intend referring work for the first time to any of our laboratories, or you intend a significant change in referral workload, please contact the relevant laboratory prior to referral, so that the laboratory can assure you that they have the capacity and resources to meet your request.

For any queries relating to Research and Development please contact our Laboratory Research Services team on pathologyp@addenbrookes.nhs.uk or 01223 596423
